About me

- I am a highly skilled and adaptable professional, proficient in Python, Java, and C++, with complementary expertise in MySQL. My strong command of Python extends to data analysis and Excel, showcasing my ability to derive valuable insights from complex datasets. As an experienced teacher, I bring excellent communication and interpersonal skills to the forefront, making complex concepts accessible to learners. Known for efficient task management and coordination, I ensure timely project completion. My leadership skills are evident in my ability to foster teamwork for collective success. Committed to continuous learning and staying abreast of industry trends, I am confident in delivering exceptional results and effectively contributing to organizational goals. My diverse skill set, both in technical proficiency and teaching capabilities, positions me as a valuable asset in any dynamic and collaborative work environment.

University projects

2019 —— 2021 —— 2023

CSE115 | C Programming:
- Online Banking System.
- Ticket Management System for Metro Rail.

CSE215 | Java Programming:
- Brick-Breaker Game.

CSE311 | Database System:
- Covid-19 Data Tracker. Real-time database project for tracking COVID-19 cases.

CSE327 | Software Engineering:
- Movie Ticket Management System.

CSE445 | Machine Learning:
- Credit Card Fraud Detection.

CSE299 | Junior Design course:
- Predicting Monthly Rainfall in Bangladesh.

CSE499 | Senior Design course:
- Autism Disease Prediction using Deep Learning & TL.

Blockchain

Development

What is Blockchain ?

I have a basic understanding of blockchain

It's use !

Smart contract & DApp

Core concepts, decentralization, consensus mechanisms, and smart contracts.

Blockchain Trainee

As a dedicated blockchain trainee at Women In Digital, I immersed myself in comprehensive learning experiences, gaining practical insights into core blockchain concepts, decentralized technologies, and smart contracts. Eager to apply my newfound skills and contribute to innovative projects within the digital landscape.

As a blockchain trainer, I transitioned from my role as a trainee at Women In Digital, now sharing my expertise to empower others in understanding and navigating the intricacies of blockchain technology.

Educational Background

O Level & A Level under Willes Little Flower School & College

2016 - 2019

Graduated from Willes Little Flower School & College with a focus on English medium education. Successfully completed O Level and A Level studies within the same academic institution, fostering a strong foundation in English language & Science background and a well-rounded education.
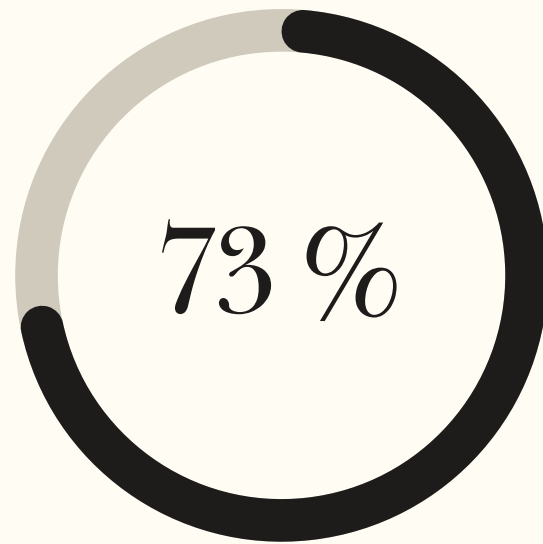

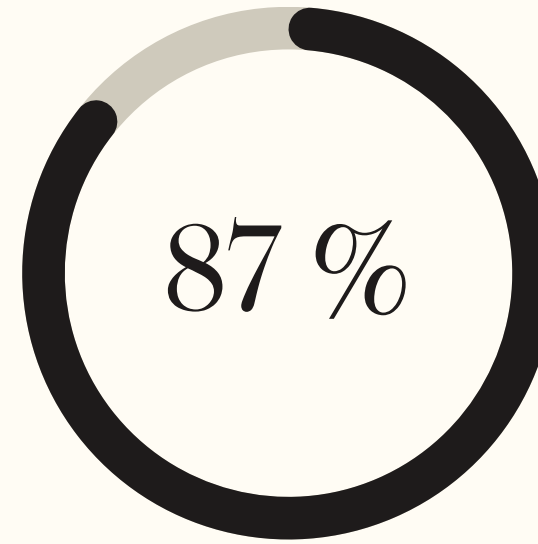

North South University

2019 - 2023

Proud alumna of North South University with a major in Computer Science and Engineering (CSE). Proficient in programming languages such as C, C++, Java, and Python. Applied my skills in a Machine Learning project, showcasing a practical understanding of diverse programming paradigms and hands-on experience in the field of computer science.
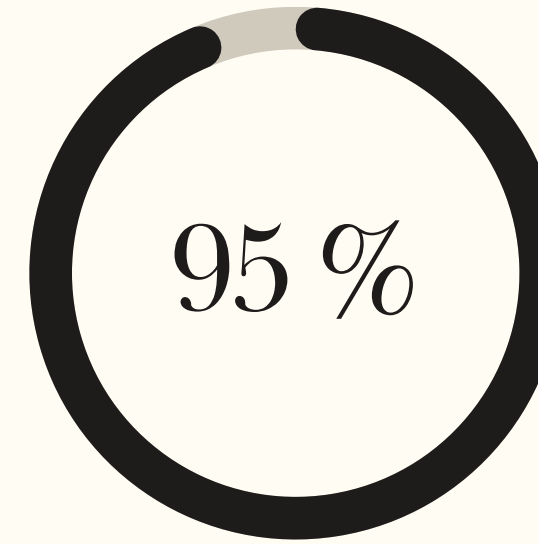

Personal Skills

Personally honing my frontend skills, I am actively engaged in hands-on projects using HTML, CSS, and JavaScript. Committed to mastering the art of creating visually appealing and interactive web interfaces through continuous self-directed learning and practical application.

My Goal

Abhishek Das

Enthusiastic about personal growth, I actively pursue opportunities to enhance my skills and expand my knowledge base. Armed with proficiency in programming languages including C, C++, Java, and Python, as well as a burgeoning skill set in HTML, CSS, and JavaScript, I am eager to apply my experiences. Possessing a resilient work ethic, positive mindset, and a commitment to overcoming challenges, I aspire to contribute effectively, making a lasting impact in innovative and collaborative settings.

Other Skills

Microsoft Excel, Power Point Presentation Slides & Word

Proficient in Microsoft Excel for data management, PowerPoint for impactful presentations, and Word for document creation, I bring a versatile skill set for diverse tasks in analysis, communication, and documentation.

Canva

Proficient in Canva, I leverage its user-friendly interface and creative tools to design visually appealing graphics and presentations, enhancing my ability to convey information with a dynamic and engaging visual impact.

MySQL

Skilled in MySQL, I proficiently manage and manipulate databases, ensuring efficient data storage and retrieval. With expertise in database design and querying, I contribute to robust and scalable data solutions for diverse applications.
